Projects Division

This division is responsible to supply all type of water equipment demanded in the Commercial sector, having expert sales Engineers who cover the following fields :

- Building Services Applications
- Water Management Applications
- Industrial Applications

***Al-Madadd
Purification
Division***

This division provides the Designs and Manufacture the quality water & Wastewater treatment products mainly :

- Revers Osmosis Plants
- Waste Water treatment units
- Grey Water Treatment Units
- Dosing Systems
- Filtration Systems – (containerized)
- Sewage Treatment Plant (containerized) (MBR / MBBR / DAF)
- Reserve osmosis system(containerized)

This division is also responsible for all technical support, having a team of qualified technicians and service experts on-hand Annual Operation & Contracts can also be arranged for :

- Supervision of Installation and commissioning
- After Sales Services – and site Support
- Maintenance Contracts for new and of old plants

Filtration Systems – (containerized)

Dosing Pumps

Reverse osmosis system (containerized)

Sewage Treatment Plant

*Work Shop
Division*

This division is responsible for all Fabrications, assemblies, installations & Commissioning the followings :

- Water Storage Tanks
- Sewage treatment plants
- Water treatment plants
- Sewage & Drainage pumping stations
- Booster & Lifting Pumps sets
- Filtration systems
- Electrical Control Panels
- Water Cooling systems

installation Tanks

installation pumps

installation sewage treatment plants

Steel Workshop

***Maintenance
& After Sales
Division***

This division is responsible for all after sales service having a call center with 5 customer service agents who can support providing the following services :

- immediate repair at the quick service center .
- On call maintenance at sites .
- Yearly Maintenance Contracts .
- Sewage pits cleaning services .

COES Company

Coes was founded in 1965, starting off producing shelves and brackets for bathroom fittings and floor-mounted lead siphons. In 1972, COES launched an innovative, patented range of polyethylene siphons, including the first washing machine siphon, and a series of floor-mounted siphons for showers and baths.

The choice of plastic in particular polyolefin, as a raw material laid the foundations for the company's future success .

wilo

WILO

Founded in 1872 as Kupfer- und Messingwarenfabrik in Dortmund, Wilo has evolved from being a local specialist to a global player. As the majority shareholder with a stake of approximately 90 percent, the Caspar Ludwig Opländer Foundation ensures the company's continuity and independence. An uncompromising customer-driven mind-set, immediate market proximity and, in particular, our culture of innovation have made us who we are: one of the worldwide leading manufacturers of high-tech pumps and pump systems.

American

American Water Heaters . Established in Johnson City, Tennessee, United States in 1996 .

American Water Heaters is a leading manufacturer of high-quality water heater products with manufacturing, research and development and corporate offices located in Johnson City, TN .

American offers a comprehensive line of residential and commercial water heaters.

HELIROMA

Founded in Portugal on 1996, Heliroma – Plásticos, SA started activity in Arrifana, Sta Maria da Feira, in the beginning the production was based on PE HD and PE LD pipes, being the target market the construction and agricultural market.

Markets evolution, the growth of competition and the strength of the company in the sector made Heliroma to increased their product range and the main remark on this improvement was to offer more solutions to the market and rearrange the product strategy with the idea of reach a much more strict and quality focus market that made the company to invest in high technology production and control systems to produce thermoplastic pipe systems for cold and hot water, PP-R pipe and fittings. In the first moment the target markets were Portugal and Spain.

Actually Heliroma is the biggest Iberian manufacturer of PP-R system. Being as well the company that offers the widest range of PP-R pipes and fittings (actually available from 20-400mm).

KOOLHEATTM

Kool Heat

KOOLHEAT water chillers is the best solution for your needs to cool the water inside the roof water tanks in the areas where the ambient temperature reaches above 45-50 C causing a discomfort water temperature to the users.

It can be used also in other different industrial applications where cold water is required such as water jet cutting , die casting, gas cooling ,welding equipment & many other different applications.

**PROUDLY
MADE
IN USA**

MyungJin Tech Co.,Ltd.

MyungJin Tech Co.,Ltd. manufacturers of "GENESIS" FRP Sectional Tanks have their state-of-the-art manufacturing unit in Gimhae, South Korea, near the port city of Busan. In order to constantly upgrade innovative water storage solutions the company's manufacturing capabilities are supported by a full scale Research Centre, constantly updating its technology and upgrading its manufacturing processes.

MyungJin Tech Co.,Ltd. is an ISO 14001 certified company that manufactures water tanks using the SMC-Hot Press Molding process to the highest specification and hygiene standards. It offers tanks with sizes ranging from 260 USG (1 m³) to 2,500,000 USG (10,000 m³) and more, for various applications such as residential, commercial, industrial, municipal and irrigation projects around the world. Every unit is supplied to the same standard of design and specification to the size and shape best suited for every need of the customer .

Blue Way

The name of BLUEWAY was founded in Australia in 1993. It has earned a worldwide reputation in the field of liquid heating and cooling systems (chillers & heat pumps) through about 20 years experience in HVACR industry. In 2007, Blueway established its subsidiary manufacturer in Shunde, Foshan of China, utilizing the manufacturing advantages here and supplying chillers and heat pumps worldwide.

Blueway produces Air/Water Heat Pumps including Swimming Pool Chiller & Heat Pumps, Indoor Swimming Pool Environment Control Systems (Dehumidifying, Cooling, Heating & Air Purifying) Multi Function Heat Pumps (House Heating, Cooling & Domestic Hot water) DC Inverter Heat Pumps, EVI Heat Pumps for low ambient temperatures, Hot Water Heat Pumps, Ground Source Heat pumps, Water Cooled Packaged Air Conditioners, etc.

Lan Shan

A professional manufacturer of various RO System, LAN SHAN Enterprise Co., Ltd. was established in 1993. We are a professional manufacturer of various reverse osmosis systems, water purifier, water fountain, commercial and industrial reverse osmosis equipment and parts/accessories. Our services contain design, planning and installation. With a wealth of experiences accumulated, we converted to product R&D, mold design and contract manufacturing.
